

Satya Suresh Devalla

☎816-493-6305 | ✉ satyasureshdevalla@gmail.com | [LinkedIn](#) | [GitHub](#)

Full Stack Java Developer with over 5 years of experience in building scalable web applications and services using Java Spring Boot, React, and cloud technologies. Proven ability to optimize performance and ensure reliability in high-demand environments. Seeking to contribute to innovative projects and create impactful solutions.

SKILLS

- Backend Development: Java (Spring Boot), JavaScript (Express.js, Node.js), Python (Flask, Django), PHP
- Frontend Development: React.js, Angular, HTML, CSS
- Database: Oracle, MySQL, MongoDB, SQL Server
- Cloud Technologies: AWS (EC2, RDS, S3), Azure DevOps
- Tools: Maven, Gradle, Docker, Jenkins
- Testing: Junit, Mockito
- Version Control: Git, GitHub
- Others: Data Structures and Algorithms, Microservices, REST APIs

WORK EXPERIENCE

Site Service Software, USA: *Full-stack Developer Intern* Aug 2024 – present

- Developed the cloud-based application utilizing React.js, Spring Boot, and SQL Server, improving system efficiency by 30% with optimized backend services and database performance.
- Performed API testing with Postman to validate functionality and reliability and implemented unit tests to ensure code quality and robustness across features.
- Utilized Git and GitHub for version control, ensuring code quality, collaborative development, and efficient workflow management.

TechMetrics Solutions, India: *Software Engineer II* Feb 2023 – Jul 2023

- Architected microservices in Java 8/Spring Boot with DI & AOP; designed RESTful APIs for high-traffic data exchange with robust error handling.
- Enhanced security via Spring Security (role-based access, JWT) and integrated AWS (SNS, SQS, CloudWatch) for real-time monitoring and auto-scaling.
- Achieved 90%+ code coverage through comprehensive unit/integration testing with JUnit and Mockito, ensuring production readiness.

Futures First, India: *Software Engineer* Aug 2022 – Feb 2023

- Developed and maintained a trading platform using Java, Spring Boot, and React—delivering tools (real-time charts, risk management, performance metrics) for 100+ traders.
- Designed React interfaces and built high-availability backend APIs with sub-5ms latency, enhancing visualization and reliability.
- Integrated technical indicators and predictive models, leveraging real-time analysis and active trading to enhance market insights and decisions.

Tata Consultancy Services, India: *Software Engineer* Oct 2021 – May 2022

- Engineered backend microservices with Java/Spring Boot for a banking system, boosting scalability by 30% and optimizing MySQL queries to reduce response times by 25% while ensuring data security.
- Developed responsive, user-friendly interfaces using React.js, enhancing customer satisfaction by 15%.
- Collaborated in agile teams via stand-ups and code reviews, ensuring seamless integration and timely feature delivery.

IntelliCloud Apps, India: *Software Development Intern* Sept 2019 – Sept 2021

- Developed full-stack apps with Java, Spring Boot, Hibernate & React, serving 10K+ daily users.
- Designed RESTful APIs and optimized SQL/PostgreSQL queries to boost data retrieval by 25% while ensuring consistency.
- Integrated 3 third-party APIs, conducted code reviews, and used Git/GitHub in Agile cycles for high-quality delivery.

PROJECTS

Student Enrollment System

- Secured user auth & profiles for students, professors, admins. Built React/Spring Boot admin panel for course mgmt & fixed, conflict-free scheduling.

Stay Hub

- Built room booking system in HTML, CSS, JS, PHP & MySQL. User-friendly UI enabling dynamic updates, real-time availability & email confirmations.

Shoe Savy

- Developed Shoe Savy with MERN stack: site categorizes shoes by price & gender; seamless selection and checkout ensure efficient shopping.

Cloud Blog

- Deployed scalable Django blog on AWS (EC2, RDS, S3, DynamoDB, CloudFront & Route 53) with secure uploads for high performance & availability.

EDUCATION

University of Central Missouri || Warrensburg, MO, USA

Aug 2023 – May 2025

M.S. Computer Science Engineering, GPA: 3.55/4

Relevant Coursework: Advanced Algorithms, Advanced Operating Systems, Advanced Database Systems, Introduction to Cloud Computing, Database Theory and Applications, Advanced Web Applications and Services Development, Advanced Applications Programming in Python, Compiler Design and Construction, Statistical Foundations for Data Science and AI

CERTIFICATIONS

AWS Certified Solutions Architect - Associate

Sept 2024
